Sampling Procedure for Total Coliform Bacteria (Well)

- ⇒ The best place to collect a well water sample is an outdoor spigot.
- ⇒ Remove any spigot attachments prior to collecting the sample.
- ⇒ Flow tap full force for 3-5 minutes or as long as it takes to clean the service line from the well. Slow down to a gentle steady flow just before collecting sample.
- ⇒ The sample bottle provided contains a 100-ml mark. **FILL TO THIS MARK AND DO NOT OVER FLOW! DO NOT TOUCH INSIDE THE CAP OR BOTTLE! DO NOT LAY THE SAMPLE BOTTLE CAP FACE UP OR DOWN ON ANY SURFACE!**
- ⇒ All samples must be delivered on ice immediately to Rockdale Water Resources at 958 Milstead Ave, Conyers, Ga 30012.
- ⇒ Make sure the name of the collector, time, date and location of the sample are correct.
- ⇒ Testing fee (\$40) Make Check payable to: "Rockdale County".

**Testing samples are accepted by RWR Customer Service Office no later than 2:00pm daily, (Monday-Thursday ONLY). Samples will NOT be accepted on Fridays.**

Name: _____	Result are to be:
Location: _____	<input type="checkbox"/> Mailed
City: _____ State: _____ Zip: _____	<input type="checkbox"/> Phone
Phone/Fax: _____	<input type="checkbox"/> Faxed
Date Sample Collected: _____
